

Change Impact Guide

Use this when modifying an existing feature. Always pair with the module's **Future Modification Guide**.

Cross-cutting hotspots

Change	Primary files	Likely collateral
New REST endpoint	*Controller , SecurityConfig	Frontend service, routes, API_DOCUMENTATION.md , redeploy Liberty
New role permission	SecurityConfig , Angular authGuard / sidebar	Employee role seeding
JWT behavior	JwtService , JwtAuthenticationFilter	Login UI storage, interceptor
Account number format	AccountNumberGenerator , AccountServiceImpl.openAccount	Existing numbers (non-retroactive), tests
Opening deposit rules	AccountPolicy* , AccountServiceImpl.openAccount	Opening-deposit dialog, customer create flow
Balance mutation	AccountServiceImpl.deposit (today)	Future Transaction module, dashboard counts
Customer identity display	BusinessIdFormatter , Customer.getCustomerCode	All UI showing customer code
API base URL	api-config.ts	All HTTP calls

Feature → impact matrix

If you change...	Also check...
Customer create with account	CustomerServiceImpl , AccountService.openAccount , policies
Deposit	Account balances only — no transaction table yet; adding ledger will touch deposit + openAccount
Account status	Future status-transition rules; deposit currently requires ACTIVE
Account policy seed	AccountPolicyInitializer ; GET policy UI dialogs
User/employee create	Roles, login, /users ADMIN gate
Dashboard counts	DashboardServiceImpl ; transaction count still stub

Frontend / backend pairs

Backend	Frontend
AuthenticationController	features/login , core/services/auth.ts
CustomerController	features/customers/*
AccountController	features/accounts/* , customer-detail account actions
AccountPolicyController	account-policy.ts , opening-deposit-dialog
UserController	features/employees/*
DashboardController	features/dashboard/*

Documentation impact checklist

After any of the above, update:

1. docs/MODULES/<Module>.md
2. docs/API_DOCUMENTATION.md and/or docs/DATABASE_SCHEMA.md if surface changed
3. docs/CALL_FLOW.md / SEQUENCE_DIAGRAMS.md for flow changes
4. docs/CHANGELOG.md (append)
5. docs/FUNCTIONAL_SPECIFICATION.md if capability status changes
